

FRAGRANCE, RECONSIDERED

Fragrance today sits on skin — it doesn't belong to it.

L'ORÉAL
BRANDSTORM
— 2026 —

THE PROBLEM:

76% of consumers prioritize longevity, yet most sprays evaporate within hours.

MARKET GAP:

Traditional sprays don't address longevity, customization, or tech-driven safety.

CONSUMER SHIFT:

65% of consumers now demand natural ingredients and ethical sourcing, moving away from synthetic, alcohol-heavy traditional sprays.

CONSUMER DEMAND:

Personalization and sustainable experiences

➤ current offerings

“Perfume smells beautiful at first, but I have to reapply after a couple of hours.”

-Reddit user

“If a brand could guarantee a scent that smells like me — not everyone else — that would be ideal.”

-Reddit user

“Non-alcoholic perfumes that claim all-day wear really catch my eye on social”

-Instagram user

What can L'Oréal do to move beyond "*spraying*" to "*infusing*"?

By reimagining how fragrance meets skin.

Presenting
Velum

Transforming fragrance from projection to intimacy — a scent that lives with you, not in the air.

Preparation

Alcohol-free diffusion. Localized, personal scent expression.

Infusion-first ritual: Replaces traditional "blow away" sprays with a skin-anchored method

Application

A luxurious, painless “stamp” ritual for skin-anchored diffusion.

Nano-Diffusion Applicator: ~500 rounded nano-tips (≤ 0.1 mm) engineered to anchor fragrance molecules within the stratum corneum. Surface-level diffusion only. No dermal penetration. No systemic exposure. Non-invasive, cosmetic-grade technology.

Infusion

Anchored within the stratum corneum for controlled, intimate release over time.

A guided, one-time ritual where the scent reveals itself on skin over time — not instantly in the air.

Post-Use

Device is automatically sanitized for the next use

Smart Hygiene: Integrated UV-C light in the cap sanitizes the tips after every session.

Longevity

Designed for extended wear (targeting 12+ hours vs. traditional 3–6 hours).

Persistence Engineering: Scent is held within the skin's structure, preventing rapid evaporation.

Adaptation

Scent evolves differently on every individual's skin chemistry

Infusion-first ritual: Replaces traditional "blow away" sprays with a skin-anchored method. Crafted with cosmetic-grade neuro-aromatic accords designed to evoke calm, focus, or freshness through scent perception.

MAPPING L'OREAL R&I PRIORITIES

Beauty Tech & Digital Services

Merges robotics with beauty to provide a safer, tech-enhanced consumer ritual.

Green Sciences & Sustainability

Refillable, long-life hardware designed for multi-year circular use. Select bio-based aroma fractions reduce petrochemical dependency.

Inclusive & Personalized Beauty

Delivers a "Beauty for Each" experience where the scent profile is unique to every user's biology.

Skin Science & Beauty

Utilizes expertise in skin barrier science to enhance efficacy without systemic absorption. Uses skin-compatible lipids/ceramides instead of harsh alcohol solvents
